

Nightingale Highlights

JANUARY 2022

Welcome Pantone's 2022 Color of the Year: Very Peri

Very Peri is Pantone's color of the year for its display of confidence and daring curiosity. This unique shade of purple is meant to spark our creative spirits, embrace new possibilities and "open us up to a new vision as we rewrite our lives". Very Peri is an optimistic color that paints the future in a new light.

This color reflects the transformative times we are living in. It is a color of hope and growth. Very Peri is the first color that Pantone has created in its historical educational color program. Pantone creating this new color demonstrates the innovative and transformative mindset that has been embraced across the globe.

Pantone's prediction of color trends impacts designers across all industries such as furniture, textile, fashion, accessory, and technology. Each year designers are influenced and challenged by Pantone's color of the year to innovatively integrate these colors/themes into the marketplace.

Very Peri is a new red violet infused blue hue that displays a lively, joyous attitude and dynamic presence that encourages imaginative expression and courageous creativity.

Purple office chairs and lounge seating products can give your office space a regal and optimistic feel. Nightingale offers a variety of high-quality textiles, vinyls and leathers which come in a wide range of colors and grades. If you desire a quality seating product that reflects the colors of the year, Nightingale has many shades of purple upholstery options to choose from.

Learn About the Legacy

Nightingale's Legacy chair series is a premier ergonomic seating solution that combines exceptional comfort and support with an attractive appearance that meets the challenges of active office environments.

The Legacy series is available in two application models: Ergonomic Task and Stool. The stool provides users with the all the ergonomic benefits of the classic Legacy in an interactive sit-to-stand design. The chair comes in low, mid or high back options, with or without arms. Further options include Enersorb™ foam seat and 3" carpet casters.

Legacy 1650
Boom II | Mirror

Legacy boasts the following ergonomic features:

Injected molded back shroud on back post for clean look.

A patented internal lumbar back support that self-adjusts to the user's back, providing incredible lateral support and pelvic stability.

Ratchet back-height adjustment to enhance chair customization and sitting experience.

Ratchet height-and-width adjustable arms with lockable pivoting polyurethane arm pads.

High-density, high resiliency molded back and seat foam for added durability and comfort.

Swivel-tilt mechanism with infinite tilt-lock, seat slider, pneumatic seat-height adjustment and tension control.

Legacy has brilliant comfort and support capabilities that encourage users to tackle their workday with confidence and ease.

Nightingale's Collaboration Spaces

Since the shift to hybrid work, it is apparent that when returning to the office employees expect their workplace to be enhanced with aspects of comfort and relaxation. The work-from-home model has granted employees flexibility and autonomy over their work environment, and in response workplaces are enhancing their office space to create more casual areas that employees are excited to work in.

Collaboration spaces are a unique workplace component that is an investment in employee comfort, productivity, and overall creativity. Collaborative spaces are unique and welcoming areas that encourage users to achieve great results in a less formal working environment. These spaces provide a refreshing take on group think areas that spark collaboration and inspire meaningful conversations between all members of a company.

Stepping out of the boardroom allows employees to interact in a less formal manner which can generate ideas and conversations that may have been stifled within the more traditional boardroom setting. Having access to such a space filled with a variety of group and individual seating options, lets employees tap into a new and more creative mindset that is reflective of the space around them.

Collaboration spaces will unlock new conversations, generate excitement, and enhance overall corporate culture and morale.

Nightingale's Collaboration Spaces

This specific example of Collaborative Space offers five unique zones:

Booth style seating provided by the **Trullo 3002** lends itself to smaller private group work settings.

Along the windows are pairs **Stratford 2000** chairs for private or one-on-one conversation or brainstorming.

Rane 901 lounge seating provides a quick seat in a transitory area for users who only plan to stay for a moment, or who are waiting for another area to open up.

Long tables allowing for six **Tonik 1100** guest chairs promote active group work.

The central lounge area featuring **Johnny 1509**, **Helen 925**, **Danforth 1220** chairs and sofa, and **Emily 610** stool allow for a group of up to nine to meet in a relaxed setting.

An area such as this provides many unique opportunities that promote group collaboration in a less structured environment. Lounge seating in its construction allows users to be supported in a less formal way compared to a task chair.

Nightingale's unique range of lounge seating options allows users to comfortably work in a relaxed environment that encourages a more receptive demeanor amongst users.

Discover the SXO

Nightingale's SXO is an executive and ergonomic task chair that is built to handle stress. With two main model options: mid back and mid back with headrest, the SXO combines design, comfort and ergonomic technology to make the most out of your workday.

The headrest is height-adjustable and has an innovative coat hook built into its design. The multi-use functions extend to the back of the chair where users will find a convenient back storage compartment to keep belongings close by.

The strong, supportive and flexible Ablex™ patterned mesh back provides all day comfort with a sleek and modern aesthetic. The mesh provides generous lumbar support, allows air

to pass freely and moves with you to help you stay cool, calm and collected in any environment.

The energy absorbing dual density ENERSORB™ seat foam conforms to your body to reduce sitting fatigue and reverts to its natural form when you exit the chair. The waterfall seat design enhances comfort by sloping away from the legs to minimize pressure points and encourage good posture.

The SXO has a wide selection of adjustable mechanisms: synchronous knee-tilt mechanism with slow seat and back release; intuitive side tension control, multi-position tilt lock, pneumatic height adjustment and an integrated seat slider for depth adjustment.

A spring-loaded, ball bearing ratcheting system operates the armrests. The arms are height and width adjustable complete with lockable swivel arm pads. Armless options are available in both models.

The SXO has a 5-prong, heavy-duty nylon base with standard 2" carpet casters. Black mesh is standard and the frame, arms, base and trim come with a graphite finish. The optional silver mesh package comes with a polished aluminum base. This chair is highly supportive and rated for users up to 350 lbs.

The SXO helps the user focus on the task at hand, while its modern look fits perfectly in any office or conference setting.
