

Nightingale Highlights

MARCH 2023

Nightingale Wins Bespoke Office Chair Manufacturer Of The Year 2023!

Nightingale is excited to announce its success in the 2023 Canadian Business Awards after being named Best Chair and Seating Making Specialists of the Year by Corporate Vision.

Notable past winners of this award are the University of Toronto, Bruce Power, Molson Coors and the Ontario Science Centre. Nightingale is pleased to be named alongside these and many other distinguishable Canadian companies.

This win marks Nightingale's fourth time receiving a distinction from the Canadian Business Awards. This renewed recognition motivates the company to continue innovating, creating and delivering the highest quality products to its customers.

The Canadian Business Awards judging panel examines companies based on their industry expertise, dedication to client satisfaction and an ongoing commitment to excellence and innovation. Winning this award exposes Nightingale to more local businesses along with Corporate Vision's 155,000 subscribers.

Nightingale is thrilled to be recognized as Best Chair and Seating Making Specialists of the Year by Corporate Vision for the 2023 Canadian Business Awards.

What You NEED To Know About PILLOW UPHOLSTERY

Nightingale has a variety of Executive Lounge seating options that are crafted to provide ultimate luxury and comfort.

The **Khroma**, **Presider**, **Reward**, **Manno** and **Tuxedo** are all seating options that use the Pillow Upholstery technique.

Pillow Upholstery is a technique that is used with vinyl, leather or leather plus to provide a wrinkled, plush appearance and to "puff up" the cushioning.

The pillow upholstery technique allows the user to experience the full level of comfort provided by Nightingale's Enersorb foam. This looser upholstery technique lets the plush foam shine through by not condensing the material as a result of pulling the leather or vinyl tightly over the padding.

PILLOW UPHOLSTERY

This technique involves working with our innovative and exceptionally comfortable Enersorb™ memory foam and fibre materials that result in a plush and very comfortable chair to sit in on select models.

The material that is used to cover this foam is almost always leather or vinyl as the cover is sewn and loosely pulled over the foam to ensure that the fibre and foam retain their shape and are able to move. A wrinkled or pleated appearance is normal when this upholstery technique is applied and limited to a selected series of products such as Tuxedo, Presider, Khroma, Reward and Manno series.

What You NEED To Know About STANDARD UPHOLSTERY

The standard upholstery technique over traditional molded and fabric foam such as what can be seen in our **EC1, EC2, EC3, EC4** and **EC5** chairs provides the chair with a sleeker design.

This look is a result of the taut pull of leather or vinyl over the foam.

This will provide a uniform look to all chairs.

To summarize when looking for a fully upholstered executive chair, please keep in mind the various techniques, standard or pillow, which can be used to achieve the look and feel you desire.

STANDARD UPHOLSTERY

This technique involves working with fabricated or molded foam that results in a uniform appearance and sleek look when sewn covers are incorporated into the upholstery. This provides an attractive design.

The materials used to cover this foam can be leather, vinyl or fabric. The cover can be a complete piece of material; which is referred to as a "pull over" or can be a sewn cover that is tightly pulled over the foam, thus clearly following the shape of the foamed part. This technique will generally provide a more firm sitting experience. Depending on the material used, the firmness can vary alot.

EC5

	Pillow Upholstery	Standard Upholstery
Design	shiny, wrinkled, plush design	sleek design
Usage	vinyl, leather or leather plus	vinyl, leather or fabric
Comfort	enhanced comfort	firm comfort
Stiffness	loose	tight

DANFORTH II SERIES

The Danforth II is a modern lounge seating option that's as easy on the eyes as it is on the wallet. Designed with high-traffic areas in mind, the Danforth II is built with high-density foam in a modular fashion that allows for ease of transport and repairability. Swivel Tablets (ATL/ATR) can also be added to Straight Arm single seat units in spaces where meetings or out-of-office work might take place along with an electrical/usb port.

Danforth II offers three unique styles for arms. Standard Straight Arms maintain a clear modular geometric look.

Rolled Arms (RD) give the seat a dressed down appearance great for informal settings. Modern Flaired Arms (MF) turn Danforth II add character and give the seat a wider, inviting appearance.

The Danforth II's modular construction allows for any unit to be built up or disassembled without any tools in a few short minutes. If repair or replacement of a panel or cushion is necessary, it can be swapped out for a new panel to save you money, and save a quality product from the landfill before its useful lifespan has expired.
